VAISAKH R IYER

UNITY DEVELOPER (FRESHER)

4918129625530 vaishakr121@gmail.com www.linkedin.com/in/vaisakh-r-iyer Manjeri, Malappuram

SUMMARY

I am a motivated Unity Developer with practical experience in building engaging 2D and 3D games and AR applications. My skill set includes a solid understanding of object-oriented programming, gameplay systems, and performance optimization. I focus on delivering smooth, immersive user experiences through thoughtful design and efficient implementation

EXPERIENCE

Unity Developer Intern

XR HORIZON

12/2025 - 02/2026 Kochi

A company focusing on augmented and virtual reality solutions

- Gained hands-on exposure to AR/VR development
- Developed projects using Unity engine
- Understanding how applications are structured and maintained

Software Development Intern

EALSUITE

06/2024 - 07/2024 Calicut

A company focused on software development and solutions

- Gained hands-on exposure to UI design
- Gained experience in software testing
- Understanding how real-world applications are structured and maintained

EDUCATION

Bachelor of Computer Applications

Kristu Jayanti College

08/2022 - 05/2025 Bangalore

PROJECTS

Photo Compressor Application

An application focused on image file compression

- Built an application to reduce image file sizes while maintaining quality

E-Sports Registration System

Application for managing e-sport tournament registrations

- Developed a desktop-based application for managing registrations for various e-sports tournaments

Dreadlord's Legacy

Platformer game focused on gameplay mechanics

- Developed core gameplay systems including movement, combat, enemy AI, level design, and performance optimization

The Asylum

A 3D horror game with immersive gameplay elements

- Created immersive horror gameplay with environment design, player interactions, and optimized visual effects

Playce

AR application incorporating advanced features

- Developed an AR app with plane detection, object placement, and optimized performance using AR Foundation

Demon Slayer Infinity Castle

VR game focusing on engaging environments and gameplay

- Created an immersive VR game with world design, combat, and engaging visuals

CERTIFICATIONS

Gen AI: Beyond the Chatbot (Google Cloud Skill Boost)

Certificate course covering various aspects of AI beyond standard applications

Blockchain Foundation certification (NPTEL)

Certification covering fundamental concepts of blockchain technology

Joy of computing using python (NPTEL)

Course focusing on the basics of programming in Python

Unity Developer (ASAP Kerala)

Certification program focused on Unity development

Generative AI for Software Development (IBM)

Course from IBM emphasizing AI in software development

SKILLS

Unity, Blockchain, Python, Java, PHP, HTML, Mechanics, JavaScript, Virtual Reality, Unity Engine, Figma, Canva

ADDITIONAL SKILLS

Persistence, Creative Vision, Empathy, Openness to Feedback, Adaptability, Time management, User-centric thinking, analytical thinking, Problem-solving
